

# Digital Holster™ Harness Instructions

**STEP 1:** The harness allows the photographer to protect the camera directly in front of the body with hands-free operation.

**STEP 2:** The METAL Snap Clips are connected to the D rings on either side of the bag.

**STEP 3:** The PLASTIC Snap Clips are connected to the lower webbing connection points on either side of the bag.

**STEP 4:** To put the harness on or off your body, grab both shoulder straps and lift the bag up and over your head. When worn, the shoulder harness crosses behind the back.

**STEP 5:** Use the buckles to adjust the bag up or down on your body.
