Be Ready "Before The Moment"

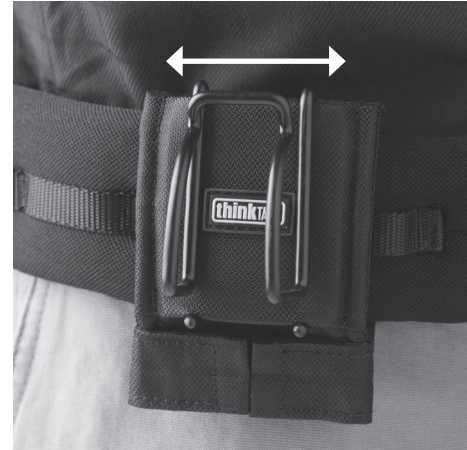

## Attaches to Individual Think Tank Belts

**Step 1:** Open the Speed Belt adapter then slide the back panel behind the belt.

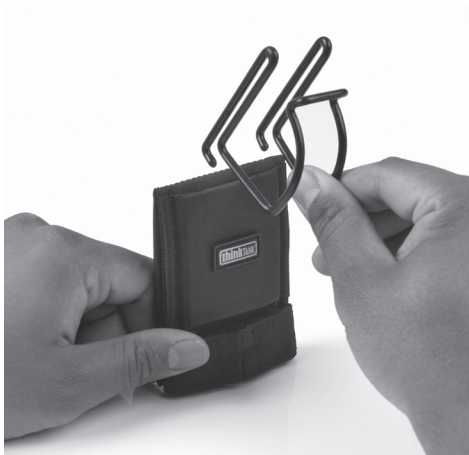

**Step 2:** Fold the front panel over the belt, sealing it in place with the hook and loop flaps.

**Step 3:** Once the adapter and hook are in place, the entire assembly can slide along the belt for better accessibility or placement.

## Attaches to Think Tank Belt Packs

**Step 1:** The Speed Belt adapter is not required to use the Headphone Hook with a Think Tank belt pack. Slide the hook out of its slot on the adapter. Store the Speed Belt adapter in a safe place.

**Step 2:** Reattach the Headphone Hook to the Modular Rail on the belt pack.

## How to Use the Multimedia Headphone Hook

To carry a pair of over-ear headphones, angle the headphones down into the narrow opening and allow to hang in place.

The Headphone Hook can also be used to carry long, coiled cables.
