Be Ready "Before The Moment"

The greatest moments in history are only captured when the photographer is ready "Before the Moment," intuitively pressing the shutter before that "Definitive Moment" occurs. Our goal is to design inventive carrying solutions that help photographers capture these moments.

Modulus components attach to waistbelt (components sold separately).

Large waistbelt for comfort.

Speed Demon™

10" L x 4.5" W x 6.75" D;
25 x 11.5 x 17 cm

Speed Demon™ Beltpack - Product Specifications

Equipment Profile: Designed primarily to switch lenses and accessories on your SLR. Modulus components can be added to the waistbelt to hold additional lenses, SLR flash, and more. A regular size SLR with lens attached can also be placed straight down in the bag.

Internal Dimensions: 10" L x 4.5" W x 6.75" D; 25 x 11.5 x 17 cm

Speed Freak™ Beltpack - Product Specifications

Equipment Profile: Designed to hold a 70-200 2.8, 80-200 2.8, 100-400, or similar size lens straight in the bag with the lens hood reversed. Will also hold a regular size SLR straight down in the bag with a lens attached. Modulus components can be added to the waistbelt.

Internal Dimensions: 10.75" L x 4.5" W x 9.25" D; 27 x 11.5 x 23.5 cm

Speed Racer™ Beltpack - Product Specifications

Equipment Profile: Designed to hold a Pro SLR with lens attached straight down in the bag. Will also hold a 80-200 2.8 or similar size lens next to the SLR with the lens hood reversed. Modulus components can be added to the waistbelt.

Internal Dimensions: 11" L x 6.25" W x 9.25" D ; 28 x 16 x 23.5 cm

Materials: YKK Duracoil Zippers (entire bag), Duraflex plastic buckles, PU Laminated Mesh (zippered organizer pockets), Silicone and PU product labels, Ballistic Nylon (bottom), Two-tone Diamond Ripstop, Span-Kodra (side pockets).

We use only YKK zippers!

The number one reason for failure in any type of bag from any manufacturer is the zipper or slider. This is why we use only YKK zippers with Duracoil technology, the most durable zipper that YKK makes, with amazingly higher abrasion test results as compared to other zippers. We also use nickel sliders, not because it's a fashion statement, but because it is the most durable finish available.

The No Rhetoric Warranty!

We don't compromise.

We build our products to last, with top quality fasteners and fabrics.

To the original owner, we guarantee and warrant the bag against any defects in material or workmanship for as long as you use the product. If you have any problems with the bag, please contact us for return authorization at warranty@thinktankphoto.com before sending the bag. We will then repair or replace the product at our option.

The No PVC Policy!

Our No PVC Policy is one of our commitments to protecting the environment. This is because PVC is known to create toxic fumes and waste. For camera bags, PVC is normally used for rubber labels (ours are made from Silicone), clear laminated mesh (ours is made from PU), and fabric (we don't use any fabric coated with PVC). Even though it costs us more to build the product, we know we're doing the right thing by not using PVC products.
